

PART A & B

POWDERED NUTRIENT

Datasheet

YOUR FORMULA FOR PLANT PROSPERITY.

This data sheet provides insights into the composition of our 1 kg Powdered Nutrient Part A & B, ensuring you have the knowledge to mix and store the concentrate correctly.

Before You Start: **Things to note.**

You cannot make up a smaller amount as the nutrients are not evenly distributed when in powder form.

Please don't mix the A & B concentrates together till you're ready to use them in the diluted form.

The powder will store indefinitely, nutrient A & B concentrates have a 12 month shelf life, and the diluted A & B mixed nutrient should be used within a month.

POWDER MIXING INSTRUCTIONS: (In a Non-Metal container)

1. Get a 2 or 2.5 litre container and measure exactly 1 litre and mark that level.
Use that as your mixing container.
2. Add all the contents of part A into that dry container.
3. Now, add hot water to the container up to the 1 litre mark.
4. Shake or stir for 2 - 3 minutes or till all the nutrients have dissolved.
Some froth may initially form but will disappear later.
5. Pour it into a plastic container with a lid and label it as part A.
6. Rinse the mixing container, and then repeat the above process with part B.

This is now your nutrient concentrate that mixes with water at 400-1.

CONCENTRATE MIXING INSTRUCTIONS: (In a Non-Metal container)

Add 5 mls of concentrate A to 1 litre of water.
Add 5 mls of concentrate B to 1 litre of water.
Combine the two together when ready.

Or just fill a 2 litre milk bottle with water
and add 5 mls of A and 5 mls of B

SHAKE WELL BEFORE USE | KEEP OUT OF REACH OF CHILDREN
